

BRICK TINTING AND BRICK REPAIR

For Brick Manufacturers and Suppliers

Remedial 
Repair  

BRICK AND MORTAR TINTING NATIONWIDE

Remedial Repair provide a professional brick and mortar tinting and repair service to manufacturers and suppliers.

Everyday our teams are working on building sites all across the UK. We also work in Ireland and parts of Europe.

With years of valuable experience within the UK construction remedial industry our technicians are highly skilled and can work with all types of clay, stone, and concrete based building materials.

We understand the needs of building product manufacturers and the importance of getting required remedial works completed swiftly, efficiently and professionally.

A RELIABLE AND PROFESSIONAL SERVICE

Typically Brick Tinting is used by Brick Manufacturers to correct brick batch colour variations on site after construction.

We also work directly with builders and developers to correct brickwork banding issues that are caused as a result of on site practices.

We can colour match even the most complicated of brick blends and our teams can work quickly and efficiently in order to minimise costs for our customers.

Remedial Repair Technicians are highly experienced and skilled in blending brickwork, helping to minimise the work on site required in order to create a finish that is correct for the product supplied and specified.

BRICK REPAIRS AND BRICK SYSTEM REPAIRS

Skilled Remedial Repair Technicians carry out on site brickwork repairs in order to cost effectively resolve onsite issues.

- ✓ Lime blow drill and fill
- ✓ Frost failure brickwork repairs
- ✓ Pre fabricated Brick Arch repairs
- ✓ Brick cladding repairs
- ✓ Brick clad underslung soffit repairs
- ✓ Repairs to pre fabricated chimneys, etc.

All our repairs are carried out using our own brick repair mortar, colour matched to blend seamlessly with the repaired brickwork.

HELPING YOU TO HANDLE ON SITE ISSUES QUICKLY AND EFFICIENTLY

We have worked hard to create and refine an efficient and customer focused process for handling projects before and after our technicians have visited site.

Your dedicated account manager will provide you with a swift quotation based on images and info supplied by yourselves.

If required we can also carry out a site survey on your behalf and handle structural remedial work as required.

Once approved, we can liaise with the site to schedule the works around their requirements and arrange any access equipment, as well as all the necessary RAMS, etc.

PROFESSIONAL AND EFFICIENT PROCESSES

When on site we first create a sample panel for approval by the site representative.

Once approved our skilled Brick Technicians will proceed to then colour tint the whole project as required, tinting in line with the approved panel and/or blending with existing brickwork as required.

Treated brickwork will be dry within a few hours on site and fully dried within 24hours, weather permitting.

Tinting can only be completed in dry weather and in temperatures above 3 degrees.

Once all work is completed it is as it will remain and the Remedial Repair lifetime guarantee is instigated.

Brick and Stone Tinting, Matching and Repair. Nationwide.

Remedial Repair works for Building Contractors, House Builders, and Builders to provide a professional repair, brick, stone

Online

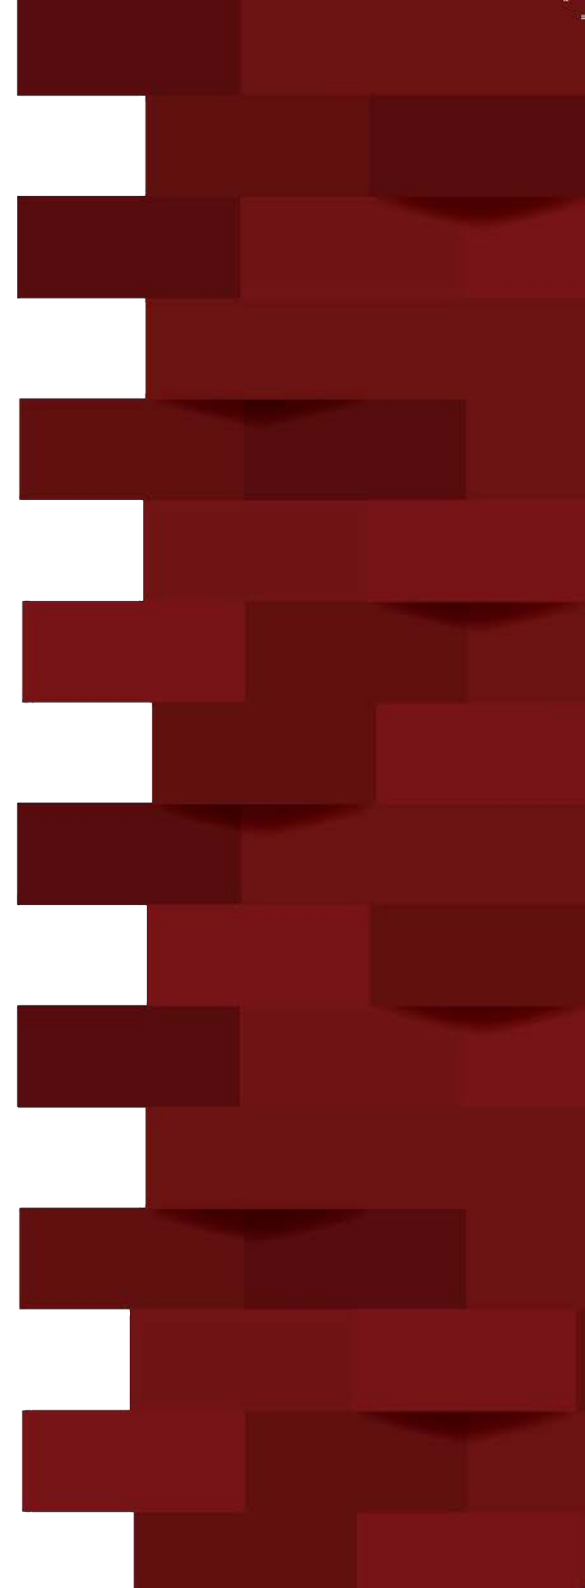

KEEP TRACK OF JOBS WITH OUR ONLINE PORTAL

You need site complaints to be dealt with quickly and efficiently in order to demonstrate good customer service and to get held invoices paid.

With that in mind we have focused on speeding up and fine tuning the instruction and on site process with the introduction of our online 'Project Portal'.

Upon your instruction, an online Job Page is created for each project with the job outline and any images supplied.

Upon completion of our work on site, 'after' pictures are added, along with a signed and completed job sheet from the site agent, your customer.

REPRESENTING YOUR BUSINESS ON SITE

When we are on site sorting out issues for building product manufacturers we are representing your business to your customers.

All our technicians are helpful, professional, and friendly. Always correctly and professionally attired, including the site required PPE at all times.

Each holds valid CSCS, IPAF, and PASMA cards as well as holding brick tinting craftsmanship certificates.

Together with our company accreditations, Remedial Repair Technicians can carry out work on any building site of any size for any contractor.

LIFETIME GUARANTEE

All Brick and Mortar Colour Tinting carried out by Bricksuk Ltd t/a Remedial Repair or Extension Match is fully guaranteed for the life of the brick or building against any natural variations, discolouring, or inferior technical characteristics caused due to the brick tinting process.

The treated brickwork will weather as 'normal' alongside the original adjoining brickwork that it has been matched to and will remain matched throughout the natural life of the brickwork, no mis-match between the teated and untreated brickwork will ever become apparent due to any change in the treated brickwork, it will weather as normal alongside the untreated brickwork.

The technical characteristic/s of your brick will remain intact and the colour tinting process will still enable the brick to 'breath' as it should do.

In the unlikely event that any colour change beyond the affects of natural weathering should occur Bricksuk Ltd will correct the aesthetics of the brickwork to the customers satisfaction.

OUR UNIQUE LIFETIME GUARANTEE

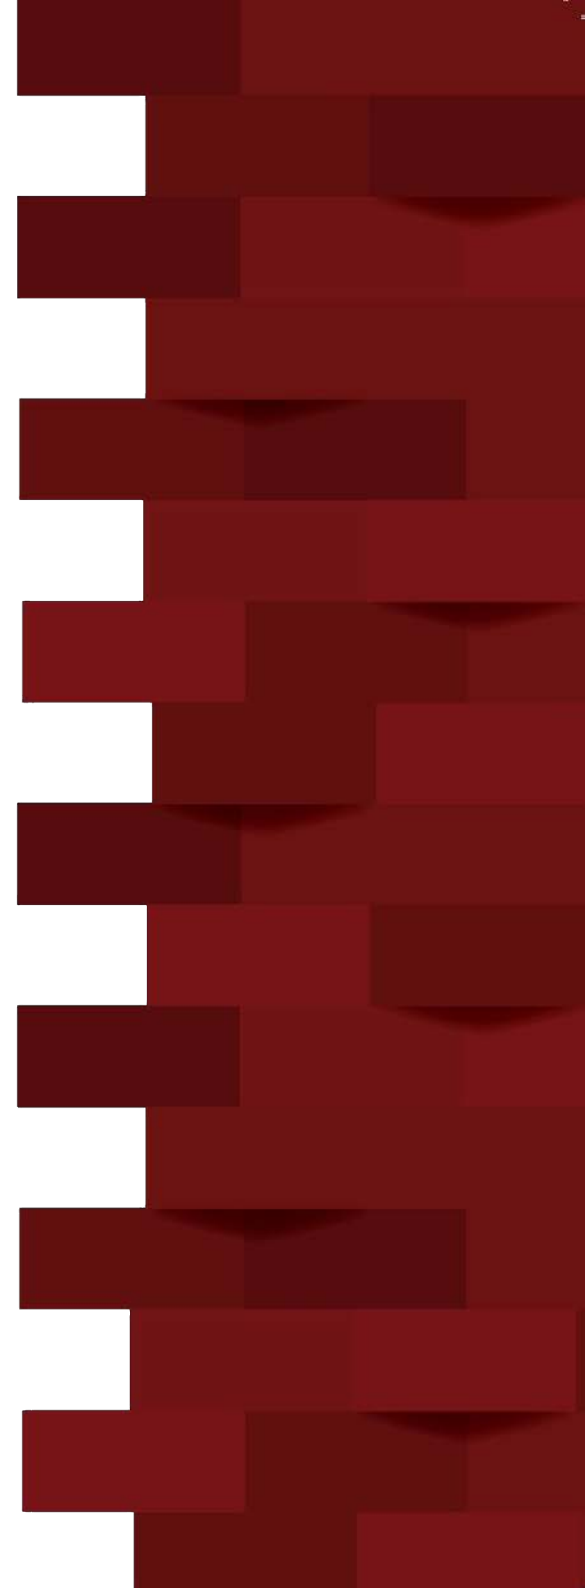

All Remedial Repair brick tinting is fully guaranteed for the life of the brick.

We use our own products manufactured from our UK based factory. This means that our guarantee covers both the tint itself as well as our workmanship.

The tinted brickwork will not fade, it will merely 'weather' as normal alongside any untreated brickwork and no difference will ever occur between treated and untreated brickwork.

Our process actually dyes the clay of the brick itself. Therefore, it will not fade or come away from the brick, it will just weather as natural and normal for a brickwork facade.

Guaranteed for the life of the brick.

TRAINING AND SUPPORT

How you handle your complaints is a great opportunity for you to demonstrate excellent customer service and grow closer to your customers.

It is with this in mind that as your Remedial Partner we provide you with a full package of support.

This includes optional training for your field sales force on what can be achieved with brick tinting and brick repair, and what information is required from site surveys in order to provide accurate quotations quickly.

It also extends to our in house structural engineering department and brickwork consultancy that can provide more detailed site surveys for structural and technical complaints.

OFF SITE FACTORY FACILITIES

The Remedial Repair factory facility is centrally located in Derbyshire, UK.

Here we can provide off site brick tinting solutions and tint bricks supplied by yourselves and deliver back to sites across the UK or Europe, palletised and shrink wrapped.

A great facility if you have bricks that need colouring to a different specification or matching to a specific brick match specification.

We often tint brick specials in order to help manufacturers and suppliers beat longer lead times associated with some factory made special shaped bricks.

WE ONLY USE OUR OWN REMEDIAL PRODUCTS

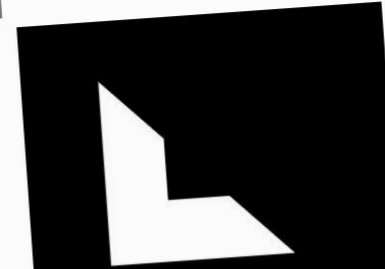

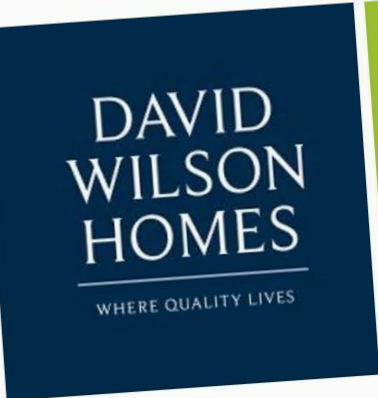

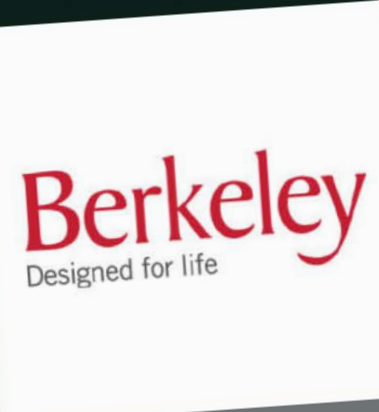

Remedial Repair Technicians only use brick tinting and brick repair products manufactured by our own building chemicals company, **RemedialWorks.co.uk**.

This enables us to provide our unique lifetime guarantee as we have complete control over all the work that we carry out, materials as well as labour.

Remedial Works products are manufactured in the UK from our factory located in Derbyshire and are available to buy online.

Excluding our range of traditional brick acids, 90% of our product range is focused on being safe to use and on minimising environmental impact.

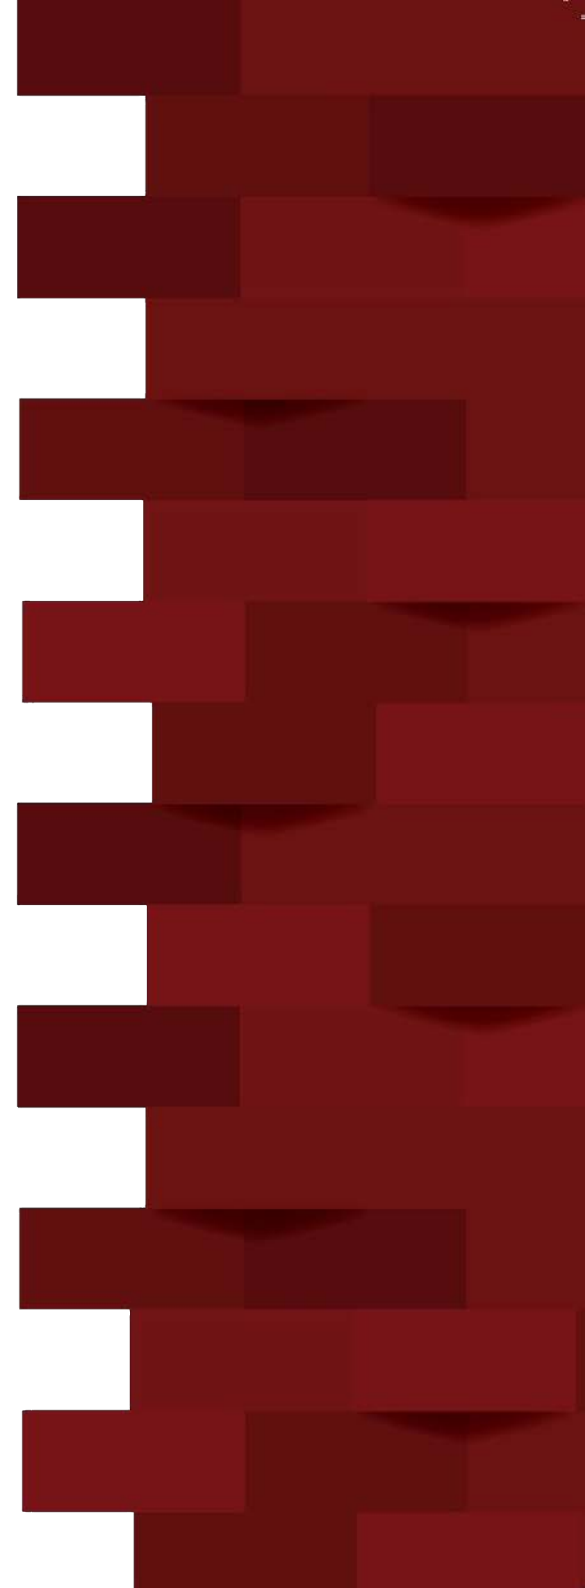

TRUSTED BY THE UK CONSTRUCTION INDUSTRY

Whether working for building product manufacturers of Housing Developers and Contractors directly, Remedial Repair have worked on many different types of buildings and building sites across the UK.

That means not only lots of experience, but also that we have all the necessary accreditations and RAMS processes already in place to work on building sites all shapes and sizes.

Equally, we are also at home sorting out very small areas of brickwork on private residential properties, all receiving the same high standard of service.

HOW BRICK TINTING CAN BE USED TO HELP SALES ...

Brick tinting is not just there to sort out problems, it can also help you to grow and develop sales.

If a site needs brick specials that are not available quickly enough, we can colour tint similar brick specials to match.

If an architect wants a certain brick look or match, we can make one of your bricks fit the bill perfectly.

Provide your customers with the guaranteed perfect brick match every time.

Increasingly, we work with our customers to help them with maximise sales opportunities.
